

Pasadena Unified School District District Service Center Facilities Department

December 23, 2010: UPDATE to Sierra Madre School Site / Construction

To Our Neighbors:

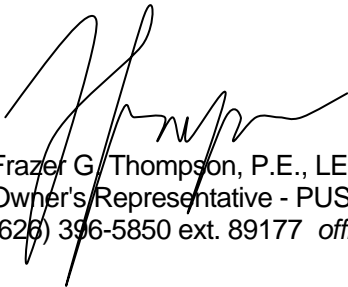

Sierra Madre Upper Campus

There are no additional updates for this week.

It has been torrentially wet and the site has held up quite well, with saturation below four feet in the foot hills. According to the National Weather Service, Pasadena has received 13 inches of rain in the last six days, with almost six inches falling yesterday alone – more than the average annual total. The site is dammed to protect from runoff.

I hope you all have a very Happy and Safe Holiday Season and our Best Wishes for a Safe and Prosperous 2011!

We'll see you all next year!
