

Pasadena Unified School District District Service Center Facilities Department

January 13, 2011: UPDATE to Sierra Madre School Site / Construction

To Our Neighbors:

Sierra Madre Upper Campus

There are no additional updates to construction at this time.

The architect is still compiling plan corrections to resubmit to the Division of the State Architect for final approval. We are projecting approval by March and bidding with an approved delivery vehicle to begin in May.

Sierra Madre Lower Campus

There is no additional work planned for this time. Currently, the Architect is consulting with the District on HVAC and cooling requirements of specific spaces within the school. This will no doubt result in the up-sizing of the existing cooling system and we are continuing to work through this.

Here's to a very successful and exciting 2011!

Sincerely,

Frazer G. Thompson, P.E., LEED ap
