| Permanent: | 25 |
| Portables: | 2 |

Assessment Summary:

Like other elementary schools in the district, Jackson was upgraded under the previous modernization program to address deficiencies identified in those years. However, there are outstanding areas of concern which need to be addressed under new maintenance and modernization programs. During the Planning Team’s site visits and interviews with staff, the following issues were observed or identified: The Cafeteria and Kitchen and several restrooms are in need of modernization; stair access to the stage at the auditorium needs to be rebuilt to code standards; deferred maintenance is needed on the exterior of Building A-A, including resurfacing the upper deck, installation of metal flashing on the entry canopy, and general repainting; and, provision of general utility upgrading to include replacement of the fire sprinkler system where needed, replacement of electrical panel boards, replacement of exterior drinking fountains, and replacement of HVAC window units and light fixtures.
