Measure TT Modernization

NARRATIVE STATEMENT

July 5, 2010

A/PCIC is providing this Narrative Statement for the months of April 2010 thru June 2010 for the PUSD Measure TT Bond Modernization. The goal of the local hiring plan will consist of 25% local hiring.

In the months of Feb 2010 thru May 2010 a total of 30 catchment area residents have been hired for the PUSD Measure TT Bond Modernization construction project. The number of hired represent 19 % of the total hired for the Measure TT Bond Modernization project.

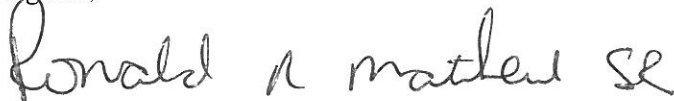

APCIC has contracted with LCP tracker and now has the enhanced/electronic capability of monitoring certified payroll for purposes of tracking local hiring; this capacity can also extend to providing data from the system to PUSD in response to the State's mandate of Labor Compliance.

This service will enhance APCIC's capacity to monitor local hiring and provide the District with accurate and up to date information on local and non local hiring percentages for construction work under Measure TT. Acquiring LCP tracker puts APCIC in a position to move forward setting up Certified Payroll collection procedures without further delay.

Pasadena/Altadena pre-apprenticeship program facilitated by the Flintridge Operating Foundation continues to serve as a feeder group of apprentice candidates to PUSD Measure TT. Trade unions are providing information on local out of work members who can be dispatched to the PUSD Measure TT Bond Modernization.

PUSD contractors/subcontractors have complied with the Local Workforce Utilization Plan developed for this project and continue to pursue and investigate new methods to increase utilization of community residents.

Regards,

Ronald K. Matthews
